Davenport Arabian Horse Conservancy

Davenport Arabian Horse Directory

This Directory of Davenport Arabian Horses is a work in progress, meant to evolve as horses are born, move, or die. This PDF is created from the online directory at <https://tinyurl.com/DavenportDirectory2019>. It will be updated when we can.

Davenport breeders, aware of the limitations of a small closed breeding population, recognize the importance of DNA testing as genetic problems are identified at that level. Information about the status of individual horses with regard to SCID, OAAM, CA and LFS will be added as it's made available by owners. See [<https://vgl.ucdavis.edu/panel/arabian-health-panel>] for information on these gene tests.

All information in the Directory Listings proper was provided by owners or caretakers, and the Conservancy cannot be responsible for errors or inaccuracies. Be sure to verify by direct contact before making breeding or purchasing decisions.

There is a second sheet of the listing, which is a list of Davenport Arabians for which information was obtained directly from the Arabian Horse Association Datasource (the Registry) and is their official word on the matter. However, unless changes and transfers are reported to them, they are unable to keep up with horse status. Horses may have been sold, gelded, exported or even died without the Registry's or the Conservancy's knowledge.

We hope you will keep the Conservancy posted about these horses and their status. As you can see, Davenport Horses as a whole can be considered rare and endangered. It is important that we keep track of each and every one and make an effort to expand the breeding population and and conserve the genetic diversity we have left.

Our cover drawing is a sketch by Doris Park, one of our own.
